Check the "Nuts and Volts" magazine. I think I saw a surplus place
selling
1 GHZ radiosondes.

Also check with WB8ELK, he sends up ballons with ATV equipment.

Electronic Goldmine sells them for 8.95.No data though!!!!!!Transmits at
1.677 ghz. I bought two, but was disapointed that there was not more
data. Also disapointed that I could not find info on the pressure sensor
on the radiosonde.
Electronic Goldmines phone number is 602-451-7454 fax 602-451-9495
Good luck!!

Subject: Getting Started on Satellites HELP!

     Hello, I'm a 'year-old ham' and am interested in receiving satellite
images (eg. weather) and contacts. Could someone give me some information
on what type of antenna's to make(or buy) and what i need in terms of
radio equipment and software to run on my 486? At present I have a 2m
handheld and a bunch of dusty radio-shack scanners! I realize that there
is a lot of info I need to catch up on, but any help you can offer will
point me in the proper direction. Thank you for your help everyone! 73's

I have no Idea, or the way to put it on FTP. I have a bud that might,
I'll try. I sent a copy to the guy on the east coast, maby he can put it
on ftp.
I use AOL for access here if you know how I can do it let me know
